## Sevocity® Selected by HP EHR Referral Group

**San Antonio, TX** –Sevocity, a division of Conceptual MindWorks, Inc. (CMI), today announced its Sevocity Electronic Health Records System has been chosen by the HP EHR Referral Group for its medical practices.

“After evaluating a number of EHR vendors, Sevocity is the first EHR vendor selected by the HP EHR Referral Group” stated Chuck Barker, one of the founding members of the group and its Treasurer. “The primary reasons for Sevocity’s selection include its ease of use, established reputation, success with other billing companies, ONC-ATCB and CCHIT certifications, ease of interfacing with our billing system and their guarantee for future free HIE interfaces”, added Barker.

Sevocity is a true Internet or cloud-based EHR System which enables it to offer both low start-up and monthly [all-inclusive pricing](#). Another distinguishing factor is Sevocity’s interoperability. Sevocity partners with practice management systems, labs and other companies to offer standard HL7 interfaces at zero cost to customers. “One of Sevocity’s goals is to minimize disruption to the medical practice. As such, we will work diligently with the practice’s current practice management or billing system, saving customers the cost, time and trouble of changing billing systems,” said Elaine Mendoza, Sevocity President and CEO.

### About HP EHR Referral Group

HP EHR Referral Group LLC ("Referral Group") is a Company formed by ten (10) Third Party Billing Companies from across the United States. All ten companies are members of the Healthcare Billing and Management Association ("HBMA") and use HealthPac Computer System’s billing solutions. The Referral Group was formed to develop preferred vendor agreements with affordable proven EHR systems that will effectively interface with their practice’s billing system. For more information on the Referral Group, please contact Chuck Barker, Treasurer, at [972-644-3232](tel:972-644-3232), Ext. 111 or email [cbarkeriii@aol.com](mailto:cbarkeriii@aol.com).
